

PhonePe Transaction Insights Report

Author: Ponna Chaitanya

Project: PhonePe Transaction Insights | **Date:** 2026

1. Introduction

Digital payments in India have grown rapidly, with platforms like PhonePe playing a major role. This project analyzes PhonePe transaction data, user engagement, and insurance trends using Python, SQL, Pandas, Plotly, and Streamlit to generate business insights and interactive visualizations.

2. Methodology

- Extracted raw JSON data from PhonePe Pulse datasets
- Processed and cleaned data using Pandas
- Loaded processed CSV files into MySQL
- Performed SQL analysis for business insights
- Developed an interactive Streamlit dashboard
- Created visualizations using Plotly and Python

3. Key Insights

- ✓ Digital payments are growing rapidly across India
- ✓ Telangana, Karnataka, and Maharashtra dominate transaction value
- ✓ Peer-to-peer payments contribute the highest transaction volume
- ✓ User engagement is concentrated among top mobile brands
- ✓ Insurance transactions are steadily increasing
- ✓ Streamlit dashboard enables real-time interactive analysis

4. Dashboard Screenshots & Analysis

Dashboard Overview with KPI Metrics

Transaction Type Distribution Analysis

Year-wise Transaction Growth

Top 10 States by Transaction Amount

5. Business Analysis

The dashboard provides detailed insights into transaction behavior across states and years. The transaction type chart clearly shows that peer-to-peer payments dominate the digital payment ecosystem. The year-wise growth chart demonstrates exponential adoption of digital payments from 2018 to 2024. The top states analysis identifies Telangana, Karnataka, and Maharashtra as leading contributors.

6. Technologies Used

Category	Technology
Programming	Python
Database	MySQL
Visualization	Plotly, Matplotlib
Dashboard	Streamlit
Data Processing	Pandas

7. Conclusion

This project successfully demonstrates an end-to-end data analytics workflow using real-world PhonePe datasets. The Streamlit dashboard provides actionable insights into transactions, user behavior, and insurance growth, helping organizations make data-driven decisions effectively.
